Dr. Felicia Simpson was an awesome teacher. She made sure that we understood the information provided. If we had questions, she was very patient in answering the questions. I really enjoyed her class and teaching style was great. Give her a raise. She deserves it.

I love the fact that you were able to teach data science at our pace. No one was left behind and you made sure of that! Your teaching skill are very very great! You did not make the course too hard or too easy, it was just right. The perfect amount of homeworks, assignments, tests, quizzes, just everything. I am really glad I was able to experience a professor like Dr. Simpson for this data science course.

Love Dr.Simpson. The best stats teacher at WSSU.
